

With the Pump Preheater you can:

- *Easily, safely and properly preheat your pump after assembly*
- *Bake out cement faster to get pump ready for use faster*
- *Helps keep graphite dry and free of moisture for improved surface life*
- *Store your spare parts so that they are always warm and ready for use*
- *Lower molten metal pump costs due to improper preheating*

Supply Requirements:

- Unit can use either natural or propane gas.
- Preferred gas pressure 1 psi or less, maximum pressure 10 psi.
- Unit provides approximately 40,000 BTU's.
- No electrical hook-up.
